# The Value of SonaStar in General Surgery Procedures:

## Reliability

On board diagnostics and troubleshooting provide operating room staff and surgeons the confidence of knowing the device will perform day in and day out, without failure.

## Versatility

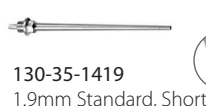

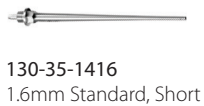

SonaStar provides users with the ability to combine ultrasonic resection with monopolar coagulation in both open and laparoscopic general surgery procedures.

## Accuracy

SonaStar allows users to accurately remove targeted tissues, minimizing damage to healthy structures and offering users procedures specific solutions for both open and laparoscopic approaches.
